Germany Officially Notified League of Nations That it Had Withdrawn from League

BERLIN, Oct. 19.—The German government officially notified the League of Nations general secretary today of its withdrawal from the League, the charged the German negotiations with failure as she announced her withdrawal from the League and from the Disarmament Conference last Saturday.

BERLIN, Oct. 14.—By one of the boldest strokes of official action since his assumption of power, Chancellor Hitler today served notice on the League of Nations that Germany will withdraw two years hence, and on the Disarmament Conference that the Reich no longer finds it possible to continue its attendance. To demonstrate to the world that all Germany stands behind the Chancellor's foreign policy, President von Hindenburg ordered the dissolution of the Reichstag and all the state parliaments and set new Reichstag elections for November 12. A vote for Reich members will at the same time mean an endorsement of the government's course.

PARIS, Oct. 16.—Completion of a disarmament convention despite the German withdrawal from the conference and the League of Nations, among the lines already known, was the official Monday as the best way out of a "serious situation."

The French government, it was said, believes an arms convention should be drawn up and presented to Germany for acceptance or rejection.

LONDON, Oct. 16.—Great Britain will refuse bluntly to curtail her armaments in view of Germany's declarations, high cabinet officials indicated today.

Count N. Ignatieff To Address Local Canadian Club

On Thursday, November 9, Count Nicholas Ignatieff will speak at a banquet to be held by the Grande Prairie branch of Associated Canadian Clubs.

Standing well over six feet, the Count is a striking personality. He spoke at the banquet in the presence of Governor-General at Pouce Coupee and proved that, although a Russian, he is a master of English.

The subject chosen for this occasion is "The New Canada."

Count Nicholas Ignatieff spent a good part of the summer in the Peace River studying conditions. His recent article on this country, published in Saturday Night, shows him to be a man of letters.

He was born in the province of Kiev, Russia, his father being governor of the province. He later lived in St. Petersburg, now known as Leningrad, when his father became minister of agriculture, and in 1900 minister of education. He was educated in a Soviet school, and when the Russians were forced to leave Russia, his education was completed in England, where he graduated in engineering from King's College, University of London.

An author of note, he now resides at Toronto.

Railway Trackmen Meet at Grande Prairie

The Brotherhood of Maintenance of Way employees recently met in convention at Grande Prairie.

One of the principal items of business which came before the meeting was the election of officers, which resulted as follows:

President—O. V. Gustafson (re-elected).
Secretary—Treasurer—P. H. Hinz, Rex Smith.

A grievance committee was elected. Wages and working conditions were discussed at some length. The keenest interest was taken in the discussion of the strike of the Pullman porters.

Practically every point along the Grande Prairie division was represented, including Dawson Creek and Pouce Coupee.

The president, in addressing the meeting, stressed the necessity of co-operation as a means to improve conditions.

There was a splendid feeling of brotherhood in evidence. The organization was founded in this area in 1927 and at present well over 90 per cent of the men engaged in this department are members.

Believes Liberals Will be Strongest Group in B.C.

James Weir, who represented Nanaimo in the Alberta Legislature from 1912 to 1921, now living in Langley, B.C., passed through the Peace River on Tuesday's train en route to the Black to speak for Dr. Watson.

GENEVA, Oct. 16.—In a ten-minute session the World Disarmament Conference this afternoon decided to accept Germany's reason for withdrawal from the conference and its announced withdrawal from the League as valid. The reply of the World Conference is contained in a telegram signed by Arthur Henderson, chairman, and dispatched forthwith to Berlin. The committee adjourned until October 20 to permit the delegates to consult their governments.

Male Voice Choir Preparing for the Coming Season

The Male Voice Choir held its first regular meeting of the season on Monday evening, in the dining room of the Grande Prairie Hotel.

Several numbers were practiced with Mrs. H. L. Vaughan at the piano, following which the election of officers was proceeded with.

Wm. Storm was elected president, to take the place of W. Adams, who resigned from the office. Mr. Adams' resignation was accepted with regret.

Frederick J. Lockyer was elected secretary. The committee adjourned until October 26 to permit the delegates to consult their governments.

Mr. Galloway, who directed the choir last season, was again named as director, while Mr. Hickman was selected as assistant conductor.

Mrs. H. L. Vaughan was appointed as accompanist. There were appointed a committee to select the music: Messrs. Galloway, Lockyer, Thorpe and Hickman.

The names of Mr. Balfour and Mr. Laurier were submitted for membership and approved.

It was decided to hold concerts every three weeks throughout the season, the first concert to be held on November 5.

It was decided, upon request, to put on a concert in the near future at the home of Mr. Adams, who was in the chair, rendering the thanks of the choir to Mr. Adams for the use of the hotel dining room as well as the piano for rehearsals during the coming winter.

Practices will be held every Monday evening and members are asked to be on hand at 8 o'clock sharp in order to avoid delays.

Good Companions To Present Play Fest Soon

An entertainment of unusual calibre is in store for citizens of Grande Prairie this district, when the Good Companions Players, organized by Mrs. Nelson Haynes, of the University of Alberta, will present an evening of one-act plays.

The first play, "The Admirable Crichton," of which these players gave such a stellar performance last year, is the author of two of the new plays chosen. "The Admirable Crichton" is a short satirical comedy with a typical English background as in the case of "The Admirable Crichton."

The second play, "The Will," is a somewhat longer piece in three acts, which begins in lighter vein, but ends on a very serious note. Both of these plays have, as one would expect of Haynes, a real point to their story.

The third play is a modern piece, which packs into twenty minutes most dramatic allegory of life. It is the most unusual attempt to dramatize an idea that is too abstract to be adequately expressed in words.

The fourth play, "The Admirable Crichton," is a short satirical comedy with a typical English background as in the case of "The Admirable Crichton."

The fifth play, "The Will," is a somewhat longer piece in three acts, which begins in lighter vein, but ends on a very serious note. Both of these plays have, as one would expect of Haynes, a real point to their story.

The sixth play is a modern piece, which packs into twenty minutes most dramatic allegory of life. It is the most unusual attempt to dramatize an idea that is too abstract to be adequately expressed in words.

The seventh play, "The Admirable Crichton," is a short satirical comedy with a typical English background as in the case of "The Admirable Crichton."

The eighth play, "The Will," is a somewhat longer piece in three acts, which begins in lighter vein, but ends on a very serious note. Both of these plays have, as one would expect of Haynes, a real point to their story.

The ninth play is a modern piece, which packs into twenty minutes most dramatic allegory of life. It is the most unusual attempt to dramatize an idea that is too abstract to be adequately expressed in words.

The tenth play, "The Admirable Crichton," is a short satirical comedy with a typical English background as in the case of "The Admirable Crichton."

The eleventh play, "The Will," is a somewhat longer piece in three acts, which begins in lighter vein, but ends on a very serious note. Both of these plays have, as one would expect of Haynes, a real point to their story.

Belgian Pilot's Sensational Invention—Fireproof Aeroplanes

Major L. Van Hulleghem (left) of the Belgian Air Force, gave a sensational demonstration in England recently of a model aeroplane made of fireproof material. Trays of gasoline were placed under the machine and a tank of gasoline placed inside and after it had burned fiercely the model and inside was found to be unharmed. In addition, when the plane was placed in the plane and was not affected either by heat or fire. The picture on the right shows the model plane enveloped in flames from which it emerged unharmed.

ent his views and propositions for the rental of the curling ice for the coming season.

It was the unanimous opinion of the executive that skating should be provided for the children, and that hockey should be played by local teams during the winter and thus provide a little recreation for the townspeople.

Mr. Donald had two propositions in mind: To rent the curling rink in the same way as last year, or give the curlers four sheets on the skating ice.

After due consideration, it was decided to carry on the same plan last year, using three sheets of curling ice on the north side and the use of the ice for curling during the winter.

Mr. Donald announced the curlers that everything possible would be done to prevent the roof over the curling ice from leaking, and that he was anxious to co-operate with the curlers every way.

The next order of business was the hiring of ice caretaker. It was decided to employ "Vic" Tanner, at the rate of \$10.00 per week.

A committee was appointed to interview Mr. Tanner, so that he would have lots of time to get the ground and other necessary fixtures ready.

The Curling Club begins this season on the north side and the use of the ice for curling during the winter.

CANADA AND THE WHEAT SITUATION

According to Premier R. B. Bennett, Europe only needs approximately 500,000 bushels of wheat from the outside.

Fear of war has driven the nations in that part of the world to become self-sustaining to the extent possible, the result is that what is being grown on a large scale and hence the little need to import wheat.

In the face of these conditions, what is Canada's position?
According to the Prime Minister, our carryover is something like 212,000 bushels. Our crop this year is estimated at 2,000,000 bushels—just about half of our peak production in 1929.

Deduct from this year's crop the hundred million for home consumption and seed, and we have 167,000,000 left for export.

This added to the carryover from a year ago, totals 2,212,000 bushels of a surplus for which we need a market on the outside.

The Premier stated that an agreement at the conference by Europe agreed to take 200,000,000 bushels of Canadian wheat. This will leave a surplus of approximately 170,000,000 bushels.

The Premier said that wheat will not get back to a normal price until production in the United States is brought in line with the demand, and he advocated a cut in the acreage in Canada of 15 per cent.

If there is actually too much wheat in the world, the cutting down of the acreage seems one way of meeting the situation. It is foolish to pile up surpluses year after year.

However, there is another side to the case. We wonder if there would be a surplus of surplus wheat if the masses of the people were all working at decent wages.

But we are dealing with the situation as it is and must meet it somehow.

WORK—NOT RELIEF—IS WHAT IS NEEDED

The agitation by the various Boards of Trade to have the highway in the Peace River gravelled is along constructive lines.

Gravel is sorely needed on our highway and other roads in the northern part of the province.

We have expended \$75,000.00 on the highway, but it rains in the north and the mud makes it impossible to travel.

During the last wet spell cars were stuck all along Lake and other roads. In some cases it was impossible to leave their cars and proceed by train.

This is, to say the least, an in-laborable condition while the snow is in the air.

Thousands upon thousands of dollars are paid out in relief, but there is absolutely nothing to show for it except a few hundred hungry mouths.

There is a country with some fifty-five thousand people whose chief desire is to stay in the country and carve out a living for themselves, and yet in wet weather it is almost impossible to travel, and in clear weather it is almost impossible to leave their cars and proceed by train.

Not only the Peace River has been affected, but the entire province has been affected, and there should be no let up in the demands of Boards of Trade and other organizations until this part of the province is treated like the other portions and given decent highways.

There should be no let up in the demands of Boards of Trade and other organizations until this part of the province is treated like the other portions and given decent highways.

not the easiest nor the most profitable method. It is all right to grow wheat, etc., but when it comes to growing grain it has not measured up to expectations.

Mr. Sweeney's suggestion is of the may-chance variety.

BRITISH COLUMBIA ELECTIONS

On November 2 the voters of British Columbia will cast their ballots for their respective choices.

In the historic head-on election there has never been so many parties nor so many candidates.

This no doubt is due to the chaotic economic conditions which exist.

To attempt to predict the result would be folly. As it looks at the writing it would appear that no one group will have a majority over the others.

In the Block, a merry battle is being fought, with no less than four candidates in the field.

Dr. Watson is the Liberal candidate; C. M. P. Plante candidate of the Non-Partisan Independent Group; Mr. C. Simons, C. P. and Mrs. Crawford, Conservatives.

The keenest interest is being taken in the election. This is the first time the north half of British Columbia has had the opportunity to elect a candidate of its own choice.

Excitement, which grows more intense as election day draws near.

Results will be learned with the keenest interest by people living on the Alberta side of the boundary in the Peace River Valley.

Only natural, for while the boundary divides, the Peace River is one great economic whole.

NO SCARCITY OF MONEY

With the rapidly with the R-funding, Loan has been taken into clear indications that there is plenty of money in certain quarters.

By the end of the second day \$150,000,000 of the \$225,000,000 loan had been subscribed.

If money could only be brought out from hiding as rapidly as it is responded to in the loan and for development purposes, the depression, so far as it is concerned, would soon be over.

There is no scarcity of money. What is needed is to get it working.

BACON HOGS FIELD DAYS

As time goes on field days are becoming more popular, as evidenced by the large crowd attending the various demonstrations.

The bacon hog field days to be held in the last of this month, featuring the best of the country's products, seem one way of meeting the situation. It is foolish to pile up surpluses year after year.

However, there is another side to the case. We wonder if there would be a surplus of surplus wheat if the masses of the people were all working at decent wages.

But we are dealing with the situation as it is and must meet it somehow.

DOES CANADA'S FUTURE LIE IN THE NORTH?

Under the shawl heading Nicholas Lafont, who spent some time in the north last summer, studying conditions, has written an article in the Saturday Evening Post.

In the article, Lafont says that the north is a land of opportunity, and that the future of Canada lies in the north.

Lafont says that the north is a land of opportunity, and that the future of Canada lies in the north.

Lafont says that the north is a land of opportunity, and that the future of Canada lies in the north.

Along The Trail

By J. B. YULE

THE "FRYING MACHINES" AGAIN MAKE THEIR APPEARANCE

On Monday afternoon I made the rounds of the local elevators to find out at first hand just how the wheat was grading.

One of the things that struck me was the heat of the elevators. It was as if I were walking into a frying pan.

These machines had not been used to this extent since the war. It was as if I were walking into a frying pan.

ILLUSTRATED NEWS OF THE WEEK

A SPECIAL TRIBUNE FEATURE THE BEST OF THE WEEK'S INTERESTING NEWS PICTURES

DEVIL'S ISLAND FELONS' FAREWELL TO HOPE

When the famous prison ship, La Martinique, recently sailed from St. Martin-de-Ré, France, on her trip to Devil's Island, the French penal settlement off the coast of Guiana, South America, for the first time in her history she carried a capacity load of criminals—207. Not only that, but also for the first time she will make a second trip in one year with 200 more bad men. Among the desperadoes in the first shipment was Guy Davis, the young Frenchman, convicted of murdering Richard Wall, an American, for \$500. The chances of anyone escaping from Devil's Island are said to be 1,000 to 1 against, for if a convict succeeds in eluding his human guards, he still must contend with fever-ridden swamps, venomous snakes and man-eating sharks that infest the surrounding waters.

PLANE VERSUS WARSHIPS—SCENE FROM THE "WAR ZONE"

This impressive photograph was taken from an aeroplane above the clouds, looking down on an incident in the British aerial-naval maneuvers that took place recently off the Porth of Forth. The Royal Air Force attacked the British Navy and in answering "battles" resulted. Looking through the clouds a warship can be seen, while hidden from it to the clouds hovers a bombing squadron.

DESPITE MISFORTUNES, MOLLISONS CONTINUE LONG DISTANCE PLANS

Regardless of the fact that they could not take advantage of the first spell of good weather for the long-distance flight due to a damaged under-carriage on their plane, Captain Mollison and his famous wife continue to make plans for the non-stop flight. The above map was drawn up just before the Mollisons tried to start their long hop and show the journey from Wiggins beach on Georgian Bay to Baghdad. If within the next few days the weather remains good while the machine is being repaired, the Mollisons may follow this route. Otherwise they will go farther north for a starting point for the record non-stop flight.

AS THE BULLETS FLEW IN THE BLOODY HAVANA BATTLE

These pictures from turbulent Cuba take you into the battle line in the vicinity of the National Hotel in Havana, where a body of army officers hostile to the new regime were besieged by troops loyal to President Grau San Martín. The top picture shows a view of the hotel, from the "business" viewpoint. During the battle; lower right, riflemen and machine gunners firing on the National from a balcony; lower left, another point of the firing line. Note the Cuban youths braving death to witness the battle. Over 100 were killed and as many more suffered injuries from the flying bullets.

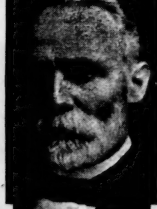

TO TEST GOLD ACT

Frederick R. Campbell, New York attorney and chairman, first man to be indicted under President Roosevelt's anti-trust proclamation and Act of Congress, Campbell was indicted for failing to register \$200,000 worth of his gold. New York Federal court granted him one week in which to set forth his contention that the law is unconstitutional.

ON PEACE CRUSADE

Tom Mann, 77-year-old British labor leader, pictured as he arrived in New York to make a 15-day tour of the United States, during which he will deliver a series of anti-war addresses. The veteran laborite is one of the world's foremost advocates of pacifism and a pioneer in the world labor movement.

ISSUES AN APPEAL

His Grace the Most Reverend C. L. Wornell, Archbishop of Nova Scotia and Primate of the Church of England in Canada, who is again issuing an appeal for western relief which will be released on October 29th.

THINK PORTS FUTURE ASSURED

Churchill, Man.—With the restoration of normal crops the future of Churchill is assured, grain men of this northern Manitoba port believed. Despite a temporary setback received when lower lake freight rates were put into effect, sailings equal to last season's record number, carried a much greater quantity of grain to overseas ports.

Royal Burns, 23, deaf mute, was sentenced to two years at New-West-mpeter, for fraud.

Dr. Frank T. Stuart, chemist and also Assistant Director of the Dominion Experimental Farm at Ottawa, who retires this month after more than forty-five years' association with the Experimental Farm.

A Few Items of World Interest

Britain is now importing more Canadian cattle.

Five passengers, all residents of Tacoma, were killed when an automobile struck a stage on the Snoqualmie Pass.

Three days late because she had to be put back for repairs, E.M.S. Empress of Canada arrived at Vancouver from Yokohama.

Merrill Board of Trade joined the Kamloops board in vigorously protesting against importation of Alberta beef into B.C.

Police believe Ronny Charlie, Indian former at Akali Lake, was shot down and burned to death in his cabin, says a Williams Lake dispatch.

The body of Joe Parker who was reported missing last May, while on a prospecting trip with his companion Harry Curtis, whose body was found in August, has been located by police at the end of Mahood Lake, entered from the Clearwater.

C.C.F. convention at Victoria agreed (1) that they want political control of the province; (2) not to amalgamate with any other group if they win; (3) to prosecute any guilty of malfeasance or misfeasance in unemployment relief in the present administration.

The price of cattle is very discouraging to cattlemen as it is evident when a man drives five head of fine fat beef about 250 miles and is offered half a cent a pound for them. Little wonder he drove them back home the 250 miles again, writes a Carthage correspondent of the Ashcroft Journal.

A flood of counterfeit currency appearing in Counterfeit has alarmed authorities. Perfect workmanship of the coins baffles offhand detection, even on the part of experts.

Co-operative arrangements have now been completed between Alberta Government, railways and municipalities to distribute vegetables to needy families in the drought-stricken areas of the province this winter.

Edmonton St. John Ambulance Organization has secured a mobile ambulance station which can be hitched to a car and rushed to accident scenes and providing victims from cold and giving treatment on the spot.

Charges that rear models are being sold by returned soldiers to second-hand dealers, who re-sell them to would-be heroes, were made in Windsor, Ont., at a meeting of the Pensioners' Protective Association which decided to investigate.

Before the League of Nations committee on social questions the Canadian delegate, Jean Desjarlais, of the Canadian legation in Paris, urged limitation of the production of opium. Canada, he added, would gladly second every effort of the League in this direction.

J. M. Royer, Frederick, N.B., and B. A. Cameron, Edmonton, Alberta, veterans of the Great War, were selected by the Department of Trade and Commerce for positions as junior trade commissioners. They will serve a year or more in the department here before being assigned to foreign posts as assistant trade commissioners.

Argentina, Australia and Denmark have been elected to seats on the League of Nations Council.

U. S. VETERANS PARADE

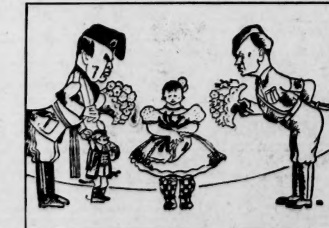

Chicago.—Like a moving human aquarium, dazzling in color, awe-inspiring in magnitude, the American Legion marched 100,000 strong down broad Michigan boulevard.

Then the grand parade of American "buddies" who did their part in the Great War, along with their women's auxiliaries swung into the Soldier Field amphitheatre to be reviewed by an assemblage of distinguished persons, Col. L. B. Lafsch, Canada's deputy minister of defence, among them.

The march past, which lasted for 10 unbroken hours, was the lone legion activity on the 15th annual convention program.

CONSERVATIVE CARTAWAY: "Not a bite will I take till I know where we are! How are we to know whether it's Empire Fruit?" The cartoonist, London.

AUSTRIA (between Mussolini and Hitler): "Thanks! I'd rather remain a minor." (Mussolini holds an Albanian doll in his hand.) Politics, Belgrade.

Tsk! My dear boy, don't you know it's naughty to go around smacking down policemen?

"QUALITY AND LOW PRICES"

Grande Prairie—TWO STORES—Sexsmith

At the
19th Hole

Although the weather was chilly last Sunday, quite a number took advantage of the nice clear day and had a few rounds of golf at the Richmond Hill golf course. However, it won't be long now before snow flies, and golf clubs will be put away in the corner, brooms will be located, then, in preparation for the curling season.

In the second flight of the men's championship tournament, the final game between C. Cady and A. H. Hillman resulted in a win for the former in a closely contested match.

The game between Dr. Carroll and L. Krant of Wembley, in the finals of the third flight, was a nip and tuck battle to the finish. "Doc" finally winning out.

The winner of the special prize donated by Pro. "Sandy" Stevenson for the one turning in the lowest card in the ladies' tournament was won by Mrs. Johnston of Wembley. The card turned in was one under ladies' par, a 54.

The finals in the women's tournament has not been played off yet, but is expected to be played this coming Sunday.

The grounds committee have placed a couple of men to rake up all the roots and fill in all the small holes on fairways 7, 8 and 9. This will make for better golf next year.

During the year ended March 31, 1933, the Dominion Division of Chemistry received 4,444 samples for analysis compared with 5,779 in the previous year.

40 CANDIDATES NOW ENLISTED IN THE NYAL Children's Popularity Contest

Now Being Conducted at
BUTCHART'S DRUG STORE

Bring Cheer to Outlying Portions Of the North

To travel six hundred miles on foot and to battle with wind for weeks, was the experience of Miss Hassel and Miss Stagle, who for the past five months have been working in the Peace River, carrying the gospel to the people in remote parts by way of the Anglican Sunday school mission van.

These two undaunted workers arrived at Grande Prairie on Saturday and, assisted by the W. A. and others, set to work packing parcels which were sent by families in the homestead areas. Bales of clothing were sent out last spring from Great Britain. These were opened and as a result the lives of many homesteaders and their families will be made just that much brighter.

Watino Rancher Pays His Old Town a Visit

Clyde Smith, rancher at Watino, was a visitor to town on Friday last, when he came to see his friends.

Mr. Smith came into the country 27 years ago and settled on land adjacent to the town in the Peace River. He and his wife, who were then ten years ago he went into the ranching business at Watino, on the Big Smoky.

Asked what he thought about the cattle market situation, the oldtimer replied that it sure had been bad for a long time. He said that he only shipped a few out this year and the market was so discouraging that he decided to stop shipping.

He stated that the grain in the valley was not hurt by the frost and that one man had shipped out a carload of wheat for which he got number one.

Frank Cousineau at Great Bear Lake Mining Field

According to a letter received by his family the other day, Frank Cousineau, who went north on the "Dumonts" with the Walker party, is in the Great Bear Lake mining field. He stated that conditions for the working man were none too good, but he himself had been a contractor to get out large quantities of wood during the winter.

The "Dumonts," he said, was still at Fitzgerald. The boat was not allowed to proceed further until it was inspected, and as the inspector left before the party arrived, inspection will not be made until next spring when the inspector returns.

A Few Items of World Interest

The Dominion Department of Agriculture reports the Dominion type from sheep each. There has been no case of this disease for the past five years; nor of dourine, a dangerous contagious disease of horses, for the past thirteen years.

There are 5,556 fully accredited herds of cattle in Canada. One thousand and ninety-eight of these are under process of being accredited free from tuberculosis, and 237 herds are waiting to be tested. Supervised herds total 15,779.

Fifty acres of Stormont grower fibre flax and fifty acres of Stormont straw flax were grown at Powna, Ont., under the direction of the Dominion Department of Agriculture. The seed from these areas was sold at a premium on the Irish market.

Valuable results have been obtained from a new method of soil treatment for the club root in turnips. As a result of important research being conducted at the Frederick, N. B. laboratory of the Dominion Department of Agriculture.

Data of much value has been accumulated by the Dominion Cereal Division on the possibility of advantageously growing two or more kinds of grain together in certain parts of Canada.

Vancouver school's enrollment is about 40,000 now, with 500 less than last year in elementary and 500 more in high.

Chicago Tribune publishes a dispatch from Canada that wool growers of the Dominion are vigorously protesting orders of U.S. tariff on underwear suits for unemployed.

Russian scientists have created an altitude record in a government balloon which soared 11 miles into the stratosphere.

The carrot is reported to be almost entirely cross-pollinated by insects. Certain well-defined populations of the flowering parts lend themselves to this theory.

The time to plant perennials depends a great deal on the species. Bulbs must be planted in the fall before the freeze-up.

Albertans still have one feature in common: they are well supplied with finer particles that hold water near the surface for the crop.

The Saskatchewan government was supplied with 100,000 cergons seedlings by the Dominion Forest Nursery Station at Sudbury last year.

There are sixty blacksmith shops in Chicago that do nothing else but horseshoeing.

AND HE SOLD TEA

The late Mr. Thomas Lipton, the famous tea merchant, said "Coke" have sunk more people than cork jackets ever saved."

LATEST NEWS FLASHES

REGINA, Sask., Oct. 19.—Practical problems involved in the world wheat agreement, signed in London last August were under discussion here today between Premier Bennett and the government officials of the three prairie provinces. A statement later in the day was anticipated.

PARIS, Oct. 18.—The cabinet today suddenly confronted serious opposition in the Chamber of Deputies over balancing the budget and officials frankly said there was danger of an overthrow.

BERLIN, Oct. 16.—Chancellor Hitler announced to the world Sunday, after Germany had definitely retired from the League of Nations and withdrawn from the International Disarmament Conference, that she had done so because she refused to be a nation of "second class rights" and wants "equality and honor."

BUDAPEST, Oct. 16.—Leading newspapers discussed today the possibility that Hungary may leave the League of Nations.

GENEVA, Oct. 17.—Germany is prepared to start negotiations for a return to the League of Nations and the Disarmament Conference, German quarters indicated today. It was revealed as likely formal negotiations would be deferred until after the German election in November.

VIENNA, Oct. 18.—A nationwide military examination has been developed in Austria. It was disclosed today, despite the handicap of the party's dissolution in this country.

GENEVA, Oct. 18.—Whether Germany will follow through her announced intention of resigning from the League of Nations is believed to hinge on the outcome of the disarmament crisis.

BERLIN, Oct. 18.—Equality with other nations in Chancellor Hitler's unilateral pre-condition for future international co-operation, he told his followers in a speech Tuesday night.

OTTAWA, Oct. 18.—Speculation over the large shipments of Canadian nickel to The Netherlands and whether it is finding its way to Germany for armament manufacture has been aroused here by export figures for the first six months of the year.

BANKOK, Siam, Oct. 14.—Heavy fighting was reported in progress today between government and rebel troops on the outskirts of this city. The rebels, who began their movement Thursday by seizing a royal aeromarine aerodrome, were reported returning after suffering heavy casualties.

WASHINGTON, Oct. 17.—Governor Morganthau, Jr., of the United States farm credit administration, today began discussions of wheat for human relief.

P.O.E. operating balance for August was \$17,205.

HALLOWEEN PARTY BY BEZANSON GIRLS

The Girls' Club of Bezanon are having a Halloween party on October 31. Ladies are asked to please bring doughnuts.

The next meeting of the club will be held at the home of Miss Margaret Moon, on November 4, at 2:30 p.m.

RIO GRANDE NEWS

RIO GRANDE, Oct. 18.—Threshing is practically finished in our district and the working men have headed their ways home to get ready for winter.

Mrs. Stan Leonard arrived home from Peace Corps Hospital with her baby son.

Mr. Nest Grinnett of Beaveridge was a visitor in the district on Sunday last.

The Misses Evelyn and Vera Ramsay were visitors in town on Thursday and Friday last, the guests of Mrs. Geo. Crumney.

Seen and Heard
Lots of fall plowing being done on the edge of the river, and it stayed there all day.
